About COMPANY

Farnav Tech is a trusted Dubai-based IT solutions company specializing in IT Annual Maintenance Contracts (AMC) and end-to-end managed IT services. We help businesses remain productive, secure, and future-ready through reliable IT infrastructure, proactive support, and strategic technology consulting.

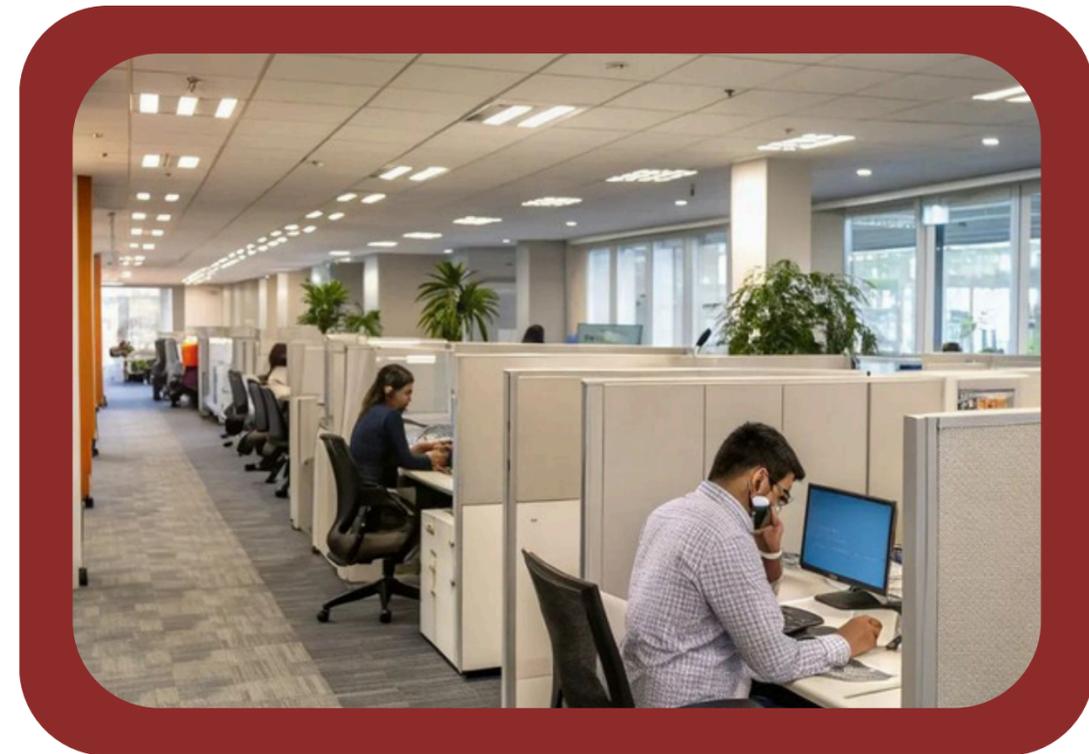

Our expert team focuses on reducing downtime, improving operational efficiency, and safeguarding critical business data. By combining deep technical expertise with strong business insight, Farnav Tech ensures your IT environment actively supports long-term growth.

VISION

To become a trusted and leading IT solutions provider in the UAE, empowering businesses with innovative, secure, and scalable technology that drives efficiency, growth, and long-term success.

MISSION

Our mission is to deliver reliable and cost-effective IT services by combining technical expertise, proactive support, and customer-centric solutions. We aim to simplify technology for businesses through dependable IT support, managed services, and digital solutions that enhance productivity and ensure business continuity.

OUR SERVICE

IT ANNUAL MAINTENANCE CONTRACT (AMC)

Farnav Tech provides comprehensive IT AMC services designed to keep your systems running smoothly throughout the year. Our proactive maintenance approach reduces downtime, improves performance, and ensures reliable support for all your IT infrastructure.

DATA BACKUP & SECURITY SOLUTIONS

Farnav Tech safeguards your critical business data through advanced backup and security solutions. We help protect against data loss, cyber threats, and system failures with reliable recovery plans.

SERVER & NETWORK MANAGEMENT

Our expert engineers manage and optimize servers and network systems to deliver maximum uptime, speed, and security. We ensure seamless connectivity and stable performance across your organization.

MANAGED IT SERVICES

Our managed IT services offer end-to-end monitoring, management, and optimization of your IT environment. We act as your dedicated IT partner, ensuring security, scalability, and uninterrupted business operations.

AMC CONTRACT FOR TASHEEL CENTERS

We offer specialized AMC contracts for Tasheel centers, providing ongoing technical support, system maintenance, and rapid issue resolution to ensure uninterrupted service delivery.

AMC CONTRACT FOR TADBEER CENTERS

Farnav Tech delivers reliable AMC support for Tadbeer centers, covering system maintenance, troubleshooting, and performance optimization to support daily operations.

EMAIL SOLUTIONS

Our secure email solutions include setup, migration, and management of professional email systems. We ensure reliable communication, enhanced security, and seamless integration.

IT INFRASTRUCTURE SUPPORT

We design, implement, and maintain robust IT infrastructures tailored to your business needs. From servers and networks to desktops and storage, our solutions ensure high performance and long-term reliability.

AMC CONTRACT FOR AMER CENTERS

Our AMC services for Amer centers ensure continuous system availability, fast technical support, and compliance with UAE government standards.

SOFTWARE DEVELOPMENT

Our software development services deliver customized, scalable, and secure applications designed to streamline business processes. From web-based systems to enterprise solutions, we build software that aligns perfectly with your operational goals.

EMAIL MIGRATION SERVICES

Farnav Tech offers seamless email migration services with zero data loss and minimal downtime. We ensure secure transfer of emails, contacts, and calendars between platforms while maintaining business continuity.

DOMAIN & HOSTING SERVICES

Farnav Tech provides reliable domain registration and secure hosting solutions tailored to your business needs. We ensure high uptime, fast performance, and secure infrastructure to support your websites, applications, and email services.

WEBSITE DESIGN & DEVELOPMENT

Farnav Tech designs modern, responsive, and SEO-friendly websites that enhance your online presence. Our websites are built for performance, security, and business growth.

UAE GOVERNMENT SERVICE

ICP (IDENTITY & CITIZENSHIP) CONFIGURATION

Our ICP configuration services ensure seamless integration with Federal Authority for Identity and Citizenship systems. We handle setup, troubleshooting, and maintenance to ensure smooth government transactions.

EMIRATES ID (EID) CONFIGURATION

Farnav Tech offers professional Emirates ID system configuration services, ensuring accurate setup, secure access, and reliable performance for authorized service centers.

E-SIGNATURE CARD CONFIGURATION

We configure and manage e-Signature card systems to enable secure digital authentication. Our services ensure compliance, data security, and smooth electronic transactions.

TASHEEL SYSTEM CONFIGURATION

We provide complete Tasheel system configuration services, ensuring proper installation, setup, and compliance with UAE government regulations. Our solutions help Tasheel centers operate efficiently and without interruption.

Our Process

1

Requirement Analysis

We assess your business needs to understand the right IT solution.

2

Planning & Design

We create a clear plan and system structure for smooth execution.

3

Implementation

We deploy and configure systems with minimal downtime.

4

Support & Optimization

We provide ongoing AMC support and system improvements.
